

I am Li Yan Qin of Boyds. I am against this Vaccine Passport proposal. So many of my friends took the vaccine and yet still got infected. What's the use of this vaccine? Now you are proposing that people who took the vaccines can pretend they are free from being infected and not infect other? We all know it is not true. Why are you allowing the vaccinated to go around town freely but not letting people who have not taken the vaccine the same treatment? The fact both groups of people are as vulnerable and as contagious. Does this proposal have any substantial merit at all? Please consider all the damage it may cause, such as hurting the small businesses and the county will have reduced tax income, children's schooling will be severely deteriorated, mental health issues will be increasing..... I am against this proposal.
